Properties in Caribbean, Mexico Offer Free COVID-19 Tests

BY HOTEL BUSINESS ON JANUARY 25, 2021

BRANDS, GUEST SERVICES & PROGRAMS, INDUSTRY

INTERNATIONAL REPORT—Several hotel chains and properties in the Caribbean and Mexico are offering guests free COVID-19 antigen tests as per Centers for Disease Control and Prevention (CDC) guidelines for guests who are traveling to the U.S.

Beach Enclave Turks & Caicos

To meet new U.S. entry requirements, and for added convenience and peace of mind, all three Beach Enclave Turks & Caicos resorts—Beach Enclave North Shore, Beach Enclave Long Bay and Beach Enclave Grace Bay—will provide complimentary COVID-19 testing for all guests returning to the country. These pre-departure tests will take place in the comfort and privacy of each guest's villa and will be coordinated directly by the concierge team.

No quarantine period is required upon arrival to the Turks and Caicos Islands. However, all international visitors must produce a negative COVID-19 PCR test taken within five days prior to arrival, proof of medical insurance and a completed questionnaire.
